Source Name: JAMESON LAKE

Tributary To:

County: Santa Barbara

Diversion within: 1/4 of 1/4 Section 28, T 5 N, R 25 W, SBB&M

Year of First Use: 1930

Name of Diversion works:

**Assessor Parcel Number
of the Diversion site:**

A. **Water is Used Under:** Riparian claim ___ Pre-1914 claim ___ Court Decree No.: ___ Other (explain): ___

B. **Year of First Use:** (Please provide if missing in the Division of Rights database (ewrims)) ___

C. **Rate of Diversion:** The rate of diversion of water for each month used and entered in the table below is shown in units of:
Gallons per minute (gpm) ___ Gallons per day (gpd) ___ Cubic feet per second (cfs) ___

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Average Rate
2005													
2006													
2007													

D. **Quantity of Water Used:** The quantity of water used each month and entered in the table below is shown in units of:
Gallons ___ Million Gallons (MG) ___ Acre-feet (AF) ___

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2005													
2006													
2007													

E. **Purpose of Use** – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation ___ acres; Stockwatering ___; Domestic ___;
Other (specify) _____

Parcel Number(s) of Place of Use: _____

F. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.) _____

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ___ NO ___
Describe any water conservation efforts you have initiated: _____

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:
Year ___ (AF/MG) Year ___ (AF/MG) Year ___ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO _____.
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES _____ NO _____.

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES _____ NO _____.
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)
I have data to support the above surface water use reductions due to the use of groundwater. YES _____ NO _____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Re: Supplemental Statement of Water Diversion and Use 1992-1994

Ladies and Gentleman:

In response to your request, we are hereby filing the Statements of Water Diversion and Use for the 1992-1994 reporting years. You will find the enclosed following surface water diversion sources in this submittal:

Statement Number	Source Name
S000355	Fox Creek
S000354	Alder Creek
S000351	Jameson Lake

It should be noted that the Alder Creek source diverts water directly into Jameson Lake. The Jameson Lake diversion, as reported, includes water from the Alder Creek diversion as well as the other Santa Ynez River sources which make up the Jameson Lake water supply. Regarding the District's right to divert water from these sources, please refer to our correspondence dated June 29, 1994 to your agency sent along with the 1991 to 1993 statement.

We have also enclosed a completed form for the Doulton Tunnel (S000352). The District will continue to report this source to your agency as a matter of record even though water being diverted is legally considered groundwater infiltration. Note that data for the year 1994 are indicating negative infiltration. The negative change in diversion coincides with the District's installation of new metering equipment. Previous metering of the Doulton Tunnel source was made using a 30 inch wide weir device with once a day recording of the weir height. The current meter provides a totalizer as well as a rate of flow measurement. We believe that the new meter accurately reflects that some District surface water diversion was lost to infiltration in the Doulton Tunnel during the calendar year 1994.

The other diversion sources requested by your Department are not being submitted and have either been permanently abandoned by the District or do not qualify as a surface water diversion.

If you have any questions regarding the above, please contact me at (805) 969-2271.

Very truly yours,

A handwritten signature in black ink that reads "C.C. Evans". The signature is written in a cursive style with a long horizontal stroke at the end of the name.

Re: Supplemental Statement of Water Diversion and Use 1991-1993

Ladies and Gentlemen:

In response to your request, we are hereby filing the Statements of Water Diversion and Use for the 1991-1993 reporting years. You will find enclosed the following surface water diversion sources in this submittal:

Statement Number	Source Name
000351	Jameson Lake
000354	Alder Creek
000355	Fox Creek

Water from these is used pursuant to the judgment in Gin S. Chow v. City of Santa Barbara, and Montecito Water District (217 Cal. 673- April 3, 1933), pre 1914 rights, prescriptive rights, public intervening use and/or appropriative right.

We have also enclosed a completed form for Doulton Tunnel (Statement Number 000352), although water from Doulton Tunnel is actually from groundwater infiltration, as determined by the Court in Gin Chow at page 22 in its "Findings of Fact and Conclusions of Law": "Said Doulton Tunnel was completed in the month of April, 1928, and said tunnel as it pierced (the Santa Ynez mountain range), intercepted and released water percolating therethrough of entrained therein. Said water so interrupted by Doulton Tunnel has been, at all times and in such quantities as were available, diverted to said District for said uses and purposes, and all of said water was actually and necessarily used therefore...No water so intercepted or which may hereafter be intercepted by said Doulton Tunnel ever did, or ever could, in a state of nature, percolate into, or become part of, the flow of the Santa Ynez River."

The other diversion sources requested by your Department are not being submitted and have been either permanently abandoned by the District or do not qualify as a surface water diversion as noted in our correspondence to you dated January 18, 1979 (see attached).

If you have any questions regarding the above, please contact me at (805) 969-2271.

Very truly yours,

A handwritten signature in cursive script that reads "C.C. Evans". The signature is written in dark ink and is positioned above the printed name.

Attention: Mr. Al Cummings

RE: SUPPLEMENTAL STATEMENTS OF WATER DIVERSION AND USE

Dear Mr. Cummings:

We are hereby filing the Statements of Water Diversion and Use for the years 1976, 1977 and 1978.

Please note that inasmuch as we are not required by the State Water Code to file Diversion and Use Reports on water wells which do not divert surface water from streams, rivers, etc., we will discontinue this practice which has been effect for some years past in this District.

We will, of course, continue to file the reports every three years on the four diversion points used by our District. The four points are as follows:

- No. 351 Jameson Lake (at Juncal Dam)
- No. 352 Doulton Tunnel
- No. 354 Alder Creek
- No. 355 Fox Creek (formerly Morris Creek)

The following diversion point is no longer in use and is hereby permanently discontinued:

- No. 353 San Ysidro Creek

The following water wells have been abandoned and are hereby permanently discontinued:

- No. 360 Buena Vista Well
- No. 356 North Portal Well

The following water wells are still in use by the District; however, reports on them will hereby discontinue due to the above-mentioned reasons:

- No. 357 Neal Well
- No. 358 Hodges Well
- No. 359 Office Well

The following new water wells used by the District have no assigned numbers and no reports will be forthcoming due to the same reasons as the other wells:

- a. Paden Well
- b. Live Oaks Well

Please maintain our name on your records so that we may receive your Form WRCB 40-i for the next three-year period for Nos. 351, 352, 354 and 355.

Yours very truly,

C.C. Evans
